Art Unit: 1775

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a weather resistant colored steel plate, classified in class 428, subclass 209.
 - II. Claim 6, drawn to a method of making a weather resistant colored steel plate, classified in class 427, subclass 372.2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP§806.05(f)). In the instant case the product as claimed can be made by a different process such as by dipping the chromate or non-chromate coated zinc plate with the resin material, then air dry the coated metal plate. The process as claimed can be used to make a different product such as a decorative artwork.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Atty: Aaron Wininger on June 17, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1775

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
